Tip of the Week #116: Build and Funnels with AI in Gym Lead Machine

2026-11-24 - Tom Regier - Tip of the Week

Funnel AI has arrived in Gym Lead Machine. You can now build funnel pages with AI from a prompt, guided inputs, a link, or an image, then keep refining them through chat requests right inside the builder.

- Generate a new page with guided **Assist** inputs or your own prompt in **Build**, using a public web page or an image as a style reference if you like
- Ask AI to revise copy, change the theme, or add pricing, testimonials, or FAQ sections without regenerating the whole page
- Keep fine-tuning colors, typography, images, and spacing with the standard builder controls

Funnel AI is one of the AI premium features, so it needs to be turned on for your account first. To get access, submit the AI premium features request form.

For the full walkthrough, see Build and Edit Funnels with AI in GLM.
