## Add a Linq Blue Text to a Workflow

Mavilyn Carlos - 2026-07-25 - [Linq Blue](#)

Want to send a text from your **Linq Blue number** inside a workflow? Gym Lead Machine gives you a special way to do that using Linq Blue's custom action. This makes sure your messages go out from the right number and stay out of spam folders.

**Note:** If you haven't activated Linq Blue yet, see [Getting Started with Linq Blue \(iMessage\)](#) to opt in and set up your iMessage line first.

### How Do I Add a Linq Blue Text to a Workflow?

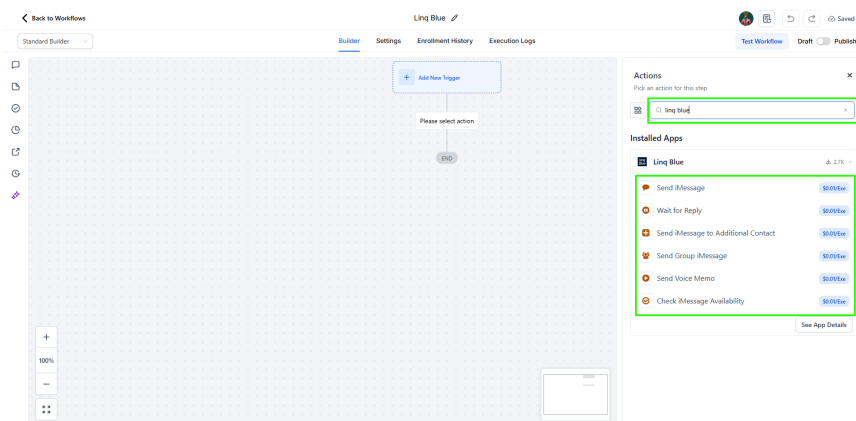

Add the Linq Blue action to your workflow and choose your Linq Blue number as the sender.

#### Step 1: Open your workflow.

1. Log in to your Gym Lead Machine account.
2. Go to **Automation**.
3. Open an existing workflow or click **+ Create Workflow** to start a new one.

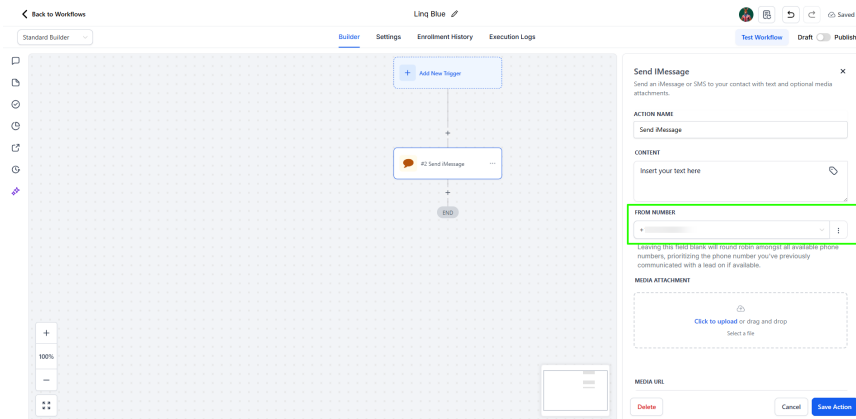

#### Step 2: Add a new action.

1. Inside the workflow builder, click the **+** button where you want the text to go.
2. Scroll down to **Linq Blue** in the list of action types.
3. Choose **Send SMS via Linq Blue** (or similar wording).

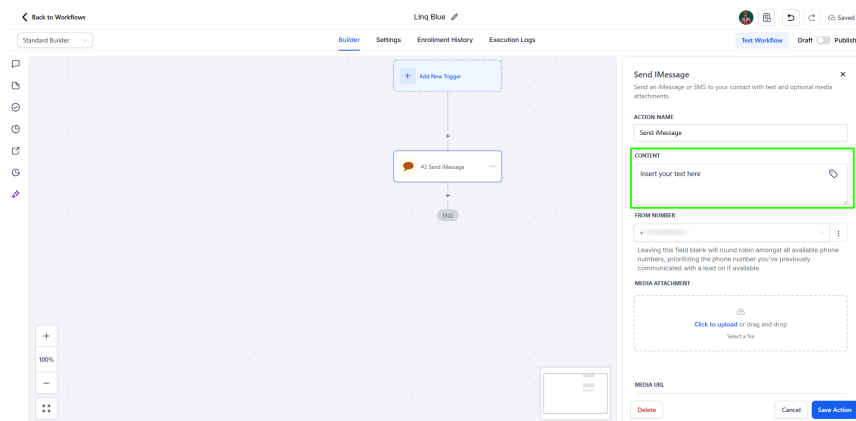

#### Step 3: Customize your text message.

1. You'll see a special Linq Blue message box appear.
2. Choose the **Linq Blue number** you want to send from (if you have more than one).

3. Type your message in the box.

4. You can use personalization fields like `{{contact.first_name}}` to make it feel personal.

#### Step 4: Save and publish.

1. Click **Save** on the message.
2. Once your workflow is ready, toggle the switch at the top to **Publish**.

---

## Why Should I Use the Linq Blue Action Instead of Regular SMS?

This special action makes sure your message sends from your Linq Blue number. It also:

- Follows all carrier rules to improve deliverability
- Prevents you from accidentally sending from a generic number

Now your workflow will send a professional, automated text from the exact number you want: no confusion, no missed messages.
