Embed Your Kilo GMS Calendar on Your Website

Laura Gibson - 2026-10-12 - Calendar & Scheduling

You can **embed your Kilo GMS class calendar directly into your website**, so athletes and visitors can view your schedule and reserve classes or book drop-in sessions without leaving your site.

What you can do with the embedded calendar

- Display your live class schedule in real time
- Let athletes reserve classes directly from your website
- Let non-members purchase and book drop-in sessions
- Give members and visitors a single booking experience on your own site

All reservations made through the embedded calendar sync instantly with Kilo GMS.

Who can use the embedded calendar?

Logged-in athletes. Athletes can reserve available classes using their existing Kilo account.

Drop-in visitors. Non-members can purchase and book drop-in sessions, based on your gym's settings and availability.

What happens when someone books from your website

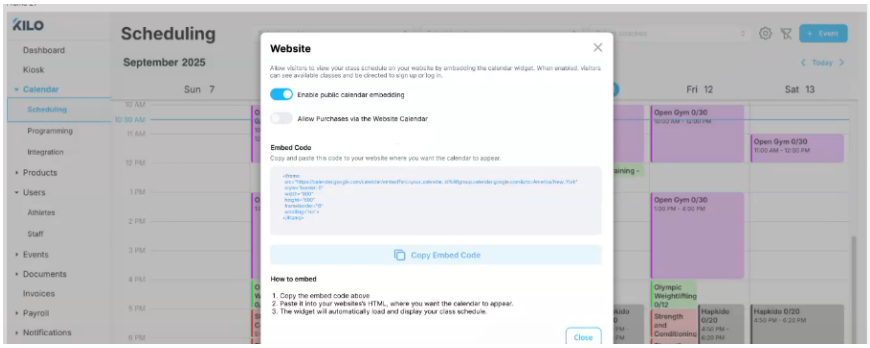

1. The athlete visits your website and views the embedded calendar.
2. They select a class or drop-in session.
3. They log in or complete the drop-in booking flow through the Sales Portal.
4. Their reservation is confirmed and appears in Kilo GMS.

There are no additional steps or redirects.

How do I add the calendar to my website?

1. Log in to **Kilo GMS**.

2. Go to **Calendar → Scheduling**.
3. Click the **gear icon**.
4. Toggle on **Enable Public Calendar embedding**.
5. Toggle on **Allow Purchases via the Website Calendar** if your Sales Portal is enabled and you want members or drop-ins to be able to purchase packages.

6. Copy the provided embed code.
7. Submit the update class schedule request form to our Website team so they can update your Schedule page.

Once the calendar is added, it stays up to date automatically as your schedule changes.

Note

If appointments have been created under the **Class** category, the embedded calendar displays those appointments on your website.

Settings the embedded calendar respects

Your embedded calendar follows your existing Kilo GMS settings, including:

- Class capacity limits
- Reservation windows
- Member and non-member access rules

Any change you make in Kilo GMS is reflected on your website calendar immediately.

When the embedded calendar is most helpful

- Giving athletes quick, convenient booking without leaving your site
- Making your website a place where visitors can act, not just read

- Encouraging drop-in bookings from new visitors
- Reducing the manual scheduling questions your staff field

If you have questions about the embedded calendar in Kilo GMS, our Support team is happy to help. Reach us at **hello@usekilo.com**.
