Prorate the Initial Monthly Payment

Laura Gibson - 2026-09-09 - [Packages & Memberships](#)

Proration is needed when selling monthly packages that, typically, bill on the first of the month. Since these memberships can be sold at any time, the initial invoice and credit dispensation need to be less to account for a shorter package length (sale date through month's end). Then, typical billing will begin on the 1st of the upcoming month.

Kilo's proration feature allows for this type of billing flexibility.

Watch the video below to understand how to:

- Allow for proration when creating a Package
- Apply a prorated first invoice and credits to an athlete
- Edit the credit dispensations for the initial package, if needed

For further questions regarding the proration of billing plans in Kilo, please contact our Support team at hello@usekilo.com.
