Use \$0 Billing Plans

Laura Gibson - 2026-09-01 - [Packages & Memberships](#)

\$0 Billing Plans are useful when you want to allow an athlete to attend class (requiring an active Package) without making a payment.

Since Packages can have multiple Billing Plans, you can simply add a \$0 plan to any Package and then apply it to an athlete.

▼ \$0

Plan Name	\$0
Total Price	\$ 0.00
# of Installments	1

Use Cases for \$0 Billing Plans

- In some cases, you may opt to switch members to Kilo V1 mid-cycle to facilitate a synchronized transition. To achieve this without additional charges during the transition, utilize \$0 billing plans. [Watch this informative video on granting members unpaid memberships for a brief period and scheduling future payments in Kilo.](#)
- Coaches who do not pay for memberships.
- Adding a new membership type or class event at no additional charge.
- Families where one member of the family pays the total amount for all members. Non-paying members should be given a membership with a \$0 billing plan so they can access events on the calendar without paying.

Note

\$0 billing plans can be "charged" by Cash/Check or another payment method. In the event that the method is Cash/Check, AutoPay will need to be "Off," and, therefore, the invoices will need to be manually collected.

If you have further questions regarding \$0 billing plans, please contact the Support team at hello@usekilo.com.
