What Platform Is My Website Built On?

Laura Gibson - 2026-07-18 - [Getting Started](#)

All Kilo websites are built using **WordPress**, the world's most popular website platform.

WordPress gives us the flexibility to create beautiful, fast, and easy-to-use websites, while also making it simple for you to update content if you choose to.

Even if you're not tech-savvy, we've designed our websites and editing experience to be as straightforward as possible. And if you're on a Concierge plan, we'll handle everything for you.

So whether you want to make a quick change or leave it to us, WordPress gives you the flexibility to do either.
