\$0.00 Discounted Invoices Are Marked Paid Automatically

2026-10-30 - Sandy Tannheimer - [Feature Updates](#)

You can now give away a package or retail item with a 100% discount code, and Kilo GMS takes care of the \$0.00 invoice for you. When a discount brings an invoice total to exactly \$0.00, the invoice is marked **Paid** the moment it's created; no charge is attempted, and it can never become Past Due.

Here's what that means for your gym:

- Complete free purchases on the Sales Portal, the athlete web checkout, and the point of sale without charging any payment method
- Collect a card only when something on the purchase will be charged later, such as a following installment, a renewal, or a follow-up package
- See every free redemption on your discount usage report and in the athlete's billing history

For the full walkthrough, see [Invoices that Total \\$0.00 after a Discount](#).
