Introducing Committed Club: A Built-In Way to Recognize Your Most Consistent Athletes

2026-08-11 - Sandy Tannheimer - [Feature Updates](#)

We're excited to launch **Committed Club**, a new loyalty feature built right into Kilo GMS. It gives every athlete a simple monthly check-in goal — and gives you real-time visibility into who's completed it, who's close, and who's building a streak.

No campaign to build. No new check-in process. Committed Club runs on kiosk check-ins, class bookings, and appointments you're already tracking.

What's new:

- A single monthly check-in goal you set for your whole gym
- Automatic enrollment for active, on-hold, and trial athletes
- A live Tracking screen showing progress, status, and streaks for every athlete
- CSV export for outreach, recognition posts, or team reporting
- Staff permissions so you control who can view tracking versus change settings

Committed Club is live now under **Committed Club** in your sidebar.

For full setup steps, FAQs, and details on how progress and streaks are calculated, check out our help article: [Setting Up and Using Committed Club in Kilo GMS](#)
