Send Waivers to Athletes in Bulk in Kilo GMS

2026-10-16 - Sandy Tannheimer - Feature Updates

You can now send waivers to a whole group of athletes at once in Kilo GMS. Filter your Athletes list to everyone without a signed waiver on file, pick a waiver template, review who will receive it, and send it to all of them in one step.

Here's what's included:

- Filter athletes with the **Has Waiver** and **Has No Waiver** filters
- Send one waiver template to many athletes, with a chance to review and uncheck recipients first
- Route waivers for dependents to their parent or guardian automatically

For the full walkthrough, see Send Waivers to Athletes in Bulk.
