Time or Credit-based Packages in Kilo GMS

2026-11-18 - Sandy Tannheimer - Feature Updates

You can now create a **Time or Credit-based Package** in Kilo GMS. This third package type renews when the time period ends or the credits run out, whichever comes first, so athletes who use their credits early can keep booking without waiting out the rest of the period.

Highlights:

- Choose it alongside Time-based and Credit-based packages on the **Select Package Type** step
- Let athletes reserve classes past the current end date using the upcoming package's credits
- Sell a one-time intro offer, such as 10 classes or 30 days, whichever comes first

For the full walkthrough, see Create a Time or Credit-based Package.
